

AB Certification Subcommittee Charter

March 24, 2022

Co-Chair – J.D. Baker

This charter hereby establishes the Certification Sub-Committee

Mission

The mission of the Certification Sub-Committee is to identify OMG specifications for which certification would be appropriate and guide the creation of a certification development team.

The Sub-Committee will work with OMG domain and platform task forces, other relevant OMG SIGs, external entities and related industry groups to facilitate the creation of certification programs. These programs will typically consist of the creation of examinations. The Sub-Committee will help to identify specifications that would benefit from the development of a certification program and assist in building the teams of individuals who will develop the examinations.

The goal of the Certification Sub-Committee will be to support the structure and processes necessary to develop high-quality programs in an efficient manner. In order to accomplish that goal, the Sub-Committee will:

- Develop certification process descriptions using OMG process modeling notations
- Evaluate the business case for the development of certification programs.
- Recommend the guiding principles, best practices and policies for managing certification programs
- Analyze existing and proposed specifications for further development of examinations
- Identify skills gaps that can be closed using OMG specifications and OMG Programs (e.g., AREA, DTC)
